

Mapping my home

- Can you visit every room in your house and order it according to size? You could even get the measuring tapes out and work out the size of each room with an adult! If your home was a country, which room would be the capital city and why?
- Can you create a plan view map of your house showing all of the rooms and maybe even the garden? You can use Lego bricks, recycled materials or just objects you can find around the house. Watch this [video](#) to see an example.
- **Time for some Literacy!** Listen to Anthony Browne's book, 'My Mum'. Can you create your own book named 'My home'? Think of all the great things your home allows you to do and describe them, for example: 'sleep like a log in my comfy bed and watch the rain trickle down the window pane.'

What if...

You could make your home different. Can you make a video to explain what you might make bigger, smaller, add or replace? Watch this [video](#) to see an example.
